

SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS

Program delivery. Reliable data. Coordinated field support.

adaptationth supports federal agencies and prime contractors with program controls, systems and data coordination, utility workflows, and installation planning. Our owner-led small business connects technical teams, field operations, and decision-makers through clear requirements, usable data, and documented handoffs.

CORE COMPETENCIES

01 Program & project delivery

Coordinate scope, schedules, risks, decisions, and stakeholder reporting across multidisciplinary teams.

Deliverables: Schedules, risk registers, decision logs, status reports.

02 Data integration & analysis

Reconcile source data, support migration and validation, and translate operational information into reporting.

Deliverables: Data mappings, exception logs, dashboards, analysis reports.

03 Utility metering & AMI support

Coordinate meter/account setup, consumption validation, billing inputs, and vendor handoffs for submetering and Advanced Metering Infrastructure (AMI) workflows.

Deliverables: Meter-account mappings, validation records, issue trackers.

04 Business analysis & systems delivery

Connect user needs to requirements, backlog priorities, change control, and software deployment readiness.

Deliverables: Requirements traceability, change requests, release checklists.

05 Installation & facility planning

Organize site survey inputs, facility attributes, IT requirements, and MILCON-related planning information.

Deliverables: Site inputs, facility datasets, planning and coordination records.

06 Logistics & field coordination

Support asset reconciliation, accountable-property data, field rollouts, training coordination, and corrective actions.

Deliverables: Reconciliation records, rollout trackers, training and handoff materials.

WHY ADAPTATIONTH

One accountable delivery lead

Direct owner involvement connects scope decisions, stakeholder coordination, and delivery follow-through.

Technical-to-operational fluency

Experience spanning utility data, federal systems, installations, and logistics helps connect work across team boundaries.

Federal operating context

Principal experience in Army and DOD environments informs documentation, field coordination, and audit-readiness support.

RELEVANT DELIVERY EXPERIENCE

Selected experience of principal Carlos Matos, gained in prior roles with the organizations identified below. These examples demonstrate the expertise available through adaptationth; they are not presented as company-held contract awards.

Utility operations across 100+ properties

Studebaker Submetering | Principal's prior experience

Coordinated account setup for more than 100 residential and commercial submetering properties, connecting technical services, installations, data migration, and initial billing cycles.

Relevant to meter/account coordination, consumption-data workflows, and utility program handoffs.

Army installation planning & data support

Army support via LMI, Vista TSI & Karder Corporation

Supported LMP implementation, data cleansing, dashboards, and installation datasets including RPLANS, CATCODE, MILCON, and ASIP. Related work included IT requirements, site surveys, NEC coordination, and planning documentation.

Relevant to facility-data quality, requirements coordination, and program visibility.

Distributed logistics systems support

U.S. Army support via CGI Federal | Afghanistan

Supported AWRDS logistics systems, SQL data updates, accountable-property reconciliation, remote-site implementation, device updates, and user training.

Relevant to field rollout coordination, asset accountability, and operational handoffs.

Discuss a defined work package

Share the customer mission, scope, schedule, and required deliverables. We will align the support role, reporting cadence, and handoff requirements with your team.
